Letter of recommendation

To whom it may concern,

With great pleasure I am writing the following letter of recommendation at the request of one of my students, Mr. Wojciech Mojsiejuk. During his study he enrolled two of my courses: Object-oriented Programming (second semester of studies) and Graduation Seminar (last two semesters of studies).

Already during the second semester of studies he proved to be a thorough and inquisitive person. His questions about the topic were well thought out and preceded by previous research and individually implemented programs – perfect in every detail. In case of any problems encountered, he first sought a solution himself. When writing a team project, he proved to be a person with leadership skills. Not only carried he out his part of the task, but also managed the rest of the team. As a trustworthy and reliable leader, he did not evade the responsibility for the work of colleagues.

During the last two semesters of studies, I had the opportunity to observe his progress in writing an engineering thesis. During the pandemic and lockdown, Mr. Wojciech proved that he can well manage his time and consistently carry out subsequent tasks. I believe that this is a huge and useful skill. It was also impossible not to notice his constant desire to learn new things. As a reviewer of his thesis I was impressed by the amount of research done. And again, he demonstrated the ability to in-depth and attention to detail.

According to my observations his personal strengths are as impressive as his intellectual accomplishments. He is an active, outgoing person in class with a great sense of humour and the ability of self-criticism. In my opinion, Mr. Wojciech is an ideal person to manage a team, but he also knows how to let others take the initiative.

Mr. Wojciech Mojsiejuk has my highest recommendation for admission to your University. If you have any questions, please do not hesitate to contact me at a.lupinska@pb.edu.pl.

Sincerely,
Anna Łupińska-Dubicka, PhD, Eng.
