

To whom it may concern,

I would like to present this letter of my student's recommendation - Mr. Wojciech Mojsiejuk. He was attending my Human - Computer Interaction and Computer Graphics classes at Faculty of Computer Science, Bialystok University of Technology.

During these classes Mr. Wojciech allowed to know himself as reliable, intelligent student - he definitely was standing out from other students. He was resolving the given problems in a creative way, his way of thinking was allowing him to find the best possible solutions for them. All of the programs he wrote had a high quality - the code was prepared according to the best standards and patterns. His skills and knowledge was much above the average level of students' on the same stage of education.

I also had pleasure to work with Mr. Wojciech outside the University. We were working together on business project - I was his team leader. The project we were working on was an R&D project, connecting IT and medicine. Mr. Wojciech was responsible for creating cloud solutions which used Artificial Intelligence, Machine Learning and Image Processing to detect a skin cancer. It was a scientific issue which required a high knowledge and creativity. Mr. Wojciech was able to deal with this issue in a very successful way, which would be unachievable for most of students.

I also know Mr. Wojciech as a good and nice person - working with him was a pure pleasure. I would like to recommend him for your University. I can guarantee you won't be disappointed with his knowledge and talents.

Yours sincerely,
Łukasz Gadomer, PhD
Faculty of Computer Science
Bialystok University of Technology
